Response

1. The response filed on 2/12/2007 has been received and made of record.
2. Applicant's argument with respect to the restriction requirement mailed on 1/25/2007 is persuasive and the restriction requirement has been withdrawn.
3. After further reviewing the claims a new double patenting rejection is made.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2157

5. Claims 74-102 are rejected under the judicially created doctrine of double patenting over claims 1-33 of U. S. Patent No. 7,127,515. Although the conflicting claims are not identical, they are not patentably distinct from each other because other than minor obvious variations the comparison made to claims 74-102 of the instant application and claims 1-33 of the patented claims reveal that claims 1-33 of the patented claims are simply species of the broader claims 74-102 of the instant application. Hence, claims 74-102 of the instant application are generic to the species of the invention covered by claims 1-33 of the patent. Thus, the broad generic invention is anticipated by the narrower of the species of the patented invention, thus without a terminal disclaimer, the species claims preclude issuance of the generic application. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993).

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
